SUMMARY

A dedicated Software Engineer who bridges Backend Engineering, Machine Learning, Data Science, and Generative AI into systems that actually ship. Hands-on experience designing data pipelines, building AI-powered applications, automating workflows, and delivering cross-platform integrations — turning research-grade models and messy data into REST APIs and full-stack platforms that hold up under real production load.

EXPERIENCE

Freelance Software Engineer / ML Engineer

Feb 2026 - Present

Independent — remote client work

- Delivered an adaptive video conversion scoring platform (videoelephant.com): a FastAPI service that scores source video quality — via OCR, ASR, face detection, and YOLO tracking — then auto-crops it into multiple ratio-specific variants for social media, with dynamic cropping, language dubbing, and subtitle generation. (FastAPI, YOLO, OpenCV, PaddleOCR, Faster-Whisper, PostgreSQL, JWT, AWS S3)
- Built a vehicle classification and damage detection system for a client in the Saudi Arabian market: a custom CUDA-trained model to classify car make/model, detect damage, and generate repair-cost estimates, served via FastAPI. (YOLO, OpenCV, TensorFlow, PyTorch, NumPy, Pandas, CUDA)

AI Software Developer · Part-Time

Mar 2024 - Dec 2025

IntelliCore Technologies — Melbourne

Concurrent with Master of AI at Deakin

- Enabled scalable AI deployment by designing modular Python backend services, cutting integration effort ~30%.
- Lifted NLP accuracy with gains reaching 15% by fine-tuning classification and sentiment models.
- Grounded LLM outputs in domain data by building RAG components.
- Containerised services with Docker/Kubernetes, CI/CD automating build → release.
- Shipped REST APIs taking model-to-app integration from days to hours.

Full Stack Developer · Full-Time

Feb 2022 - Jun 2023

Contour Software Ltd

- Delivered a real estate platform for hundreds of concurrent users — AngularJS front end, .NET 6 backend.
- Cut average API latency by a quarter with high-performance RESTful services.
- Sped up core workflows ~20% by optimising business logic and queries.
- Contributed to CI/CD pipelines improving deployment consistency; integrated Power BI dashboards.

PROJECTS

Adaptive video conversion scoring platform

Scores source video quality to auto-crop into multiple social-ready variants, with dynamic cropping, language dubbing, and subtitle generation. Live at [videoelephant.com](#) · [GitHub](#)

[FastAPI](#) · [YOLO](#) · [OpenCV](#) · [PaddleOCR](#) · [Faster-Whisper](#) · [AWS S3](#)
11+ content sources ingested

Vehicle classification & damage detection

Custom CUDA-trained model for a Saudi Arabian market client — classifies make/model, detects damage, generates repair-cost estimates.

[YOLO](#) · [OpenCV](#) · [TensorFlow](#) · [PyTorch](#) · [CUDA](#)
CUDA-accelerated inference

Real estate management platform

Full-stack platform shipped for hundreds of concurrent users with executive Power BI reporting.

[AngularJS](#) · [.NET 6](#) · [SQL](#)
↓25% average API latency

RAG-based PDF chatbot & dashboard

Self-contained retrieval-augmented chatbot that answers questions from uploaded PDFs with cited sources, runs fully offline with zero API keys. [GitHub](#)

[Python](#) · [Streamlit](#) · [RAG](#) · [scikit-learn](#)
\$0 API cost (offline mode)

EDUCATION

Master of Artificial Intelligence (Professional)

Deakin University · 2023–2025 full-time · WAM 67.08

Data Science major. Thesis: Explainability in Reinforcement Learning using LLMs — used LLMs to translate an RL agent's decision-making into plain-language explanations for non-expert stakeholders.

Bachelor of Computer Systems Engineering

NED University of Engineering & Technology · 2018–2022 · GPA 3.32

FYP: AI-based automatic code generation for web front-ends. Published Research Paper — IEEE.

CERTIFICATIONS & LANGUAGES

Microsoft Certified: Azure AI Fundamentals — [verified via Credly](#)

Microsoft Certified: Azure AI Engineer Associate — [verified via Microsoft Learn](#)

Urdu Native **Gujarati** Native **English** Professional **Arabic** Conversational

CORE STACK

Programming: Python, Java, Node.js, SQL

AI / ML: TensorFlow, PyTorch, Keras, Scikit-Learn, NLTK, NLP, YOLO, Computer Vision

Generative AI / LLMs: LLMs, LangChain, RAG, Prompt Engineering, Twilio

Data Engineering: Apache Airflow, Kafka

Data Analytics: Pandas, NumPy, Matplotlib, Plotly

Web Frameworks: FastAPI, Flask, Django, Express.js, .NET 6, .NET Core 6, AngularJS

Databases: Oracle, PostgreSQL, MySQL, MongoDB

Cloud & DevOps: AWS S3, Docker, Kubernetes, Linux, Git, CI/CD, Azure

APIs & Architecture: REST APIs, Microservices
